

To all nursing AAS students and potential nursing students:

In November 2018 Las Vegas College came under new ownership and a new name. You will find on this website the 2018 Gainful Employment Disclosure for the Associate's Degree in Nursing for Altierus Career College – Henderson, which was the school's name at that time while under prior ownership.

Upon recent review of the 2017 data that is referenced in this nursing disclosure that had been posted on the website by the prior ownership it was found:

1. The disclosure stated that 62% of nursing program graduates got jobs in 2017 according to the Nevada job placement rate calculation methodology. The Nevada Quarterly/Annual Report to the Commission on Postsecondary Education for the calendar year 2017 reports the correct rate as 42%.
2. The disclosure also stated that 90% of program graduates got jobs according to the ACCSC job placement rate methodology. The ACCSC job placement rate disclosure is unchanged at 90%. The State and ACCSC calculation methodologies are different and are therefore calculated according to their respective methodology.
3. The website disclosure discrepancy under the State methodology was created in March 2018, prior to the change in ownership. While the prior owner reported the correct rate for 2017 (42%) to the State, it failed to accurately update the Gainful Employment disclosure template, possibly because they had announced a teach out and were not enrolling new students in 2018.

Please take into account this additional information when reviewing the 2018 Gainful Employment Disclosure for the Associate's Degree in Nursing for Altierus Career College – Henderson on this website.
